

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task. It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

- Very Easy task (1) – up to 20 minutes
- Normal task (2) – 30 minutes to 1 hour
- Moderate task (3) – around 3 hours
- Difficult task (5) – around 6 hours

Story Point Scale (1, 2, 3, 5)

Project: Script-Controlled ACL – Restrict Record Access Based on Field Value

Sprint 1

Users and Roles Creation (Epic 1)

Users Creation (USN1) 2

Roles Creation (USN2) 2

Tables Creation (Epic 2)

Creation of Table (USN3) 1

ACL Configuration – Read (Epic 3)

ACL Configuration (USN4) 2

Total Story Points in Sprint 1 = 2 + 2 + 1 + 2 = 7

Sprint 2

ACL-Create (Epic 4)

Creation of ACL-Create (USN5) 5

ACL-Write (Epic 5)

Creation of ACL-Write (USN6) 3

ACL-Delete (Epic 6)

Creation of ACL-Delete (USN7) 2

Conclusion (Epic 7)

Project Outcome (USN8) 1

Total Story Points in Sprint 2 = 5 + 3 + 2 + 1 = 11

Total Story Points

Sprint 1 = 7

Sprint 2 = 11

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 7 + 11 = 18

Number of Sprints = 2

Velocity = $18 / 2 = 9$ (Story Points per Sprint)

Your team's velocity is 9 Story Points per Sprint.
